# CONDITION OF THE MARKETS

Wheat Somewhat Stronger at Chicago, Closing with Irregular Changes.

Not So Easy to Force Prices Up as It Was-Corn Active and Firmer-Oats Scarce and Higher-Hog Products Steady.

### MONEY, STOCKS AND BONDS, The Market Stronger-Big Four and Other

Vanderbilts Advance. NEW YORK, June 5 .- Money on call was easy, ranging from 4 to 512 per cent., the last loan being made at 4 per cent., closing offered at 312 per cent.

Prime mercantile paper 434 @612 per cent. Sterling exchange more active and strong at \$4.8412 for sixty-day bills and \$4.8612 for demand.

The total sales of stocks to-day were 294,-086 shares, including the following: Atchison, 16,538; Canada Southern, 3,800; Delaware, Lackawanna & Western, 5,400; Lake Shore, 1,090; Louisville & Nashville, 5,600; Missouri Pacific, 11,326; Oregon Transcontinental, 16,960; Reading, 4,910; Richmond & West Point, 5,450; St. Paul, 17,600; Union

Pacific, 8,455. The stock market was less animated today, but displayed a firm undertone from opening to close, and, although there was considerable irregularity shown, almost everything traded in is higher to-night. There is marked absence of pressure to sell such as has made the dealings of the past week so feverish and weak, and while the demand was moderate it was sufficient, even with the disposition of the foreigners to sell their favorites. The discussion of the silver bill in the House of Representatives to-day revived the hopeful feeling and the possibility of early action on the same soon showed in improved prices and increased animation. The market outside of Sugar Refineries showed no particular activity and that stock seemed to have lost its power over the regular list, and when it declined there was no response, and its subsequent advance met with no recognition whatever. The money question to-day was not a factor, and while the sub-treasury continues to draw funds from the banks the flow from the interior more than makes up the drain, and funds were easy on call to-day at from 4 to 5 per cent. Among the features of the day's trading Sugar Refiner-ies was most prominent, and after opening up 1 per cent. at 7612, it reacted to 761s, but later steadily advanced, with mod-erate fluctuations, until near the close, when its best price was reached, 804. It finally closed at 80. There was no news of any kind with a bearing upon the stock, and the rise seems to be only a natural reaction from the late depression. In the regular list Rock Island was strong on the explanation that the company has charged \$1,000,000 betterments to operating expenses. The market made very little progress in either direction until well into the afternoon, when the influence of the prospects of a silver bill being passed had their legitimate effect, and several stocks moved up sharply, and among them the most noted were C., C., C. & St. Louis, Chicago Gas, Wheeling & Lake Erie, Hocking Valley and Chic Southern. The Vanderbilt stocks

Chio Southern. The Vanderbilt stocks were again prominent for strength throughout the day, and served to give a tone to dealings, especially in the forence. The close was quiet and strong, generally at about best prices of the day. The list is almost invariably higher, and Sugar rose 4½. C., C., C. & St. L. and Chicago Gas 1¼ each, Missouri Pacific 1½, and New England 1 per cent.

Railroad bonds were more active to-day, but while the general tone was still firm there was considerable irregularity about the movements and little special feature. The dealings extended to \$1,691.000, out of which Reading fours, which were the only active issues to-day, furnished \$402.000. The principal changes include Milwankee, Lake Shore & Western, Ashald division, 4¼, to 119; Heiena & Red Mountain firsts, 2¼, to 108½; Southern Pacific, of California, firsts, 2¼, to 114¼. Among the losses was firsts, 214, to 11414. Among the losses was Peoria, Decatur & Evansville seconds, 3,

Government bonds were dull and steady. State bonds were dull but firm. Closing

NEW YORK, June 5 .- Bar silver, \$1.03. TRADING AT CHICAGO.

Wheat Active, Closing Irregular - Corn Stronger and Oats Much Higher. CHICAGO, June 5 .- Trading in wheat was fairly active, chiefly on local account. The feeling was somewhat unsettled, but the market was not so excitable and did not respond so readily to bull influences as a few days ago. Evidently some of the operators who have been on the long side of the market are trading on the short side now, which tends to keep down the market and prevent prices from advancing so sharply. The market opened about 4@ 120 lower, and prices further declined 140, then advanced 118@114c, fluctuated some and closed about 4c higher for July, 4sc lower for August, unchanged for September and 1se lower for December than the closing prices yesterday. The weather was fine abroad, and favorable for the crops here, and, with fair offerings and only light demand, an easy feeling prevailed at the start. But the news coming on the market was of a character to turn many early sellers to buyers and a steady upturn in prices resulted. Bad crop news from the winter-wheat States was again received. The Cincinnati Price Current, it was claimed, estimated the crop of the United States at about 425,000,000 bushels, that is 275,000,000 bushels of winter and 150,-900,000 bushels of spring, with chances of winter wheat being more likely to go below the estimate than above it. Corn was active and stronger, higher prices being the rule on all futures. The advance was due to local influences, though bad crop reports had some effect, several large com-mission houses buying freely of July, supposed to be for a prominent provision operator. The market was rather dull at the opening, with first sales a shade under the closing prices of yesterday, but soon became stronger and sold up 5sc, ruled easier, and closed 423sc better than yesterday. Oats were active, stronger and prices decidedly higher. The advance was due to moderate receipts, rather unfavorable crop reports, light offerings and a good demand for all futures, especially for August and September, which advanced 1282012c on light purchases by a prominent operator. June advanced 11sc. and July osc, closed the same to 4c below outside figures. Reports were that the crop would be considerably reduced, and advices from Tennessee said that the crop in that State had been abandoned. Very little was doing in pork, and the feeling was steady. Prices ruled about 10c lower, closing quiet. Quite an active business was transacted in lard, and the market was was transacted in lard, and the market was stronger. Prices ruled .0212@.05c higher, and the market closed comparatively steady. Trading in ribs was quite active, and the feeling was stronger. Prices were advanced .0212@.05c, and the appreciation millers were fair buyers of the better buyers in, and they have made liberal pur-

was fairly well supported. The leading futures ranged as follows:

Hogs dull and lower on heavy; pigs and light Yorkers nothing doing; mediums and heavy mixed and heavy Yorkers, \$3.35.

INDIANAPOLIS MARKETS. Trade Brisk, Prices Firm, and an Easy

Money Market.

chases. Cotton goods carry a very strong tone. Woolen goods rule steady. In the grocery markets a brisk trade is in progress, and sugars and coffees, in fact all staple articles, carry a firm tone. On crop prospects the New Orleans Sugar Bowl, of June 2, says: "We have had good growing weather, and crops of all kinds are now in full vigor. In some places there has been too much rain, and grass is gaining headway." However, up to this week the fields too much rain, and grass is gaining headway. However, up to this week the fields
have been remarkably free from grass, except in those cases where the crop had to
be neglected for work on the levees. Fortunately these cases are now few in number. Cane is better than it generally averages at this season; plant cane, as a rule, is
almost a perfect crop, while the stubble,
though injured on many places by the
freeze of March 1, is yet a good average
stand. Everything strengthens the belief
that our sagar crop this year will be as large
as that of 1889. Rice is doing well in most
places and a large crop has been planted.
This hardy crop has a critical period—
when the seed is germinating and the
spronts are young and tender—and in a few spronts are young and tender—and in a few localities, where high tides or excessive rain-falls occurred, the crop was somewhat injured. In those places the stand is not perfect." The produce markets are active. Poultry was firmer to-day on a decrease in receipts. Eggs, as well, are firm, and in good request. Butter is weak, and in large supply. Strawberries are plenty, and selling low. New potatoes are arriving freely, and prices go off \$1 a barrel.

The local market to-day was decidedly flat, and the bidding on 'Change showed that neither millers nor shippers were disposed to take hold with any freedom. Track bids to-day ruled as follows:

Wheat—No. 2 red, 9212c; No. 3 red, 87 @90c; rejected, 75@80c; unmerchantable, 60@70c. Corn—No. 1 white, 35c; No. 2 white, 34<sup>1</sup>2c; No. 3 white, 34<sup>1</sup>2c; No. 4 white, 33c; No. 2 yellow, 34c; No. 3 yellow, 33<sup>1</sup>2c; No. 4 yellow, 33c; No. 2 mixed, 34c; No. 3 mixed, 33<sup>1</sup>2c; No. 4 mixed, 33c; mixed ear, 34c; yellow, 35c; white, 34@35c, latter for one color. The Care of Bees.

Lizzie E. Cotton, in New England Farmer. Bees are as easily managed as chickens; it is much less labor and expense to take it is much less labor and expense to take care of them and they will pay a great deal better. The question is often asked, "How many stocks of bees can be kept in one place profitably?" This depends on the number of honey-yielding plants and flowers within reach of the bees. Some localities furnish a much greater number than others. In some localities fifty stocks would do well and pay yearly a handsome profit; in others it would not be profitable to keep half as many.

Bees go seven miles or more to collect honey, but the shorter the distance the more honey will be collected in a season. The only safe plan is to commence with a very

only safe plan is to commence with a very few and increase the number moderately until you find how many can be profitably

I have had the care of bees for nearly thirty years, and I find it a pleasure to take care of them. In my early efforts at beecare of them. In my early efforts at beekeeping I met with many failures from being confused by the contradictory teachings of selfish or ignorant beekeepers and from a lack of that personal knowledge which experience and a close study of the nature and habits of bees alone can give.

Spring is the best time to commence beekeeping for many reasons. A lady of my acquaintance in Kansas commenced beekeeping in the spring of 1882 with one swarm of Italian bees. She obtained that season sixty pounds of nice honey in boxes season sixty pounds of nice honey in boxes and the bees in fine condition to winter. Another in Illinois commenced in the spring of 1880. The first season she got one nice, large, new swarm and a good yield of boxhoney; the second season she had two swarms to commence with and obtained four new swarms and about 500 pounds of box honey. In 1882 she had increased her number to ten and was meeting with very encouraging success. So we might enumerate many cases where women have been successful in bee culture.

The great necessity of commencing with strong stocks in the very best hive cannot be too strongly urged upon the beginner. All who do not fully understand the natural habits of bees would save themselves much trouble and perplexity by starting with the best that can be obtained, notwithstanding the first cost may seem high; the best is the cheapest in the end.

It is an established fact that to succeed well with bees they must be kept in hives suited to their habits and requirements, and they must be managed on principles in accord with nature's laws and the instincts and habits of the honey-bee.

Some have great fear of stings and should use a protection for the face and woolen

use a protection for the face and woolen mittens for the hands until they can venture without them. In my own experience I seldom use any protection. I often transfer the bees, comb and honey from old box hives to my new hives, cutting out comb with the bees adhering and fitting all in movable frames and transferring to the new hives. Bees seldom sting if we under-stand their natural habits and handle them with due respect to certain laws that gov-

### The Sheep's Foot. Prairie Farmer. How many owners of sheep know the

nature of the sheep's foot, and how delicate a thing it is. Sheep are frequently lame for want of attention to its construction and necessities. If one will examine the foot between the claws, an opening will be found which is lined with fine hairs, the purpose of which is to prevent sand or mud frem getting into the opening. This opening is a causal or duct, which ends in a gland, and the duct is called the inter-ungulate causal. The gland secretes a viscid fluid which escapes when in excess through this causal. The fluid lubricates the tendons this canal. The fluid lubricates the tendons of the feet and keeps them soft and supple. When for any reason there is a surplus, the excess drains away through this duct. If by any means this escaping fluid is retained in the duct, it hardens and closes the opening. Right here the trouble begins. Every mechanic who understands the nature of a box in which a shaft turns, and which is kept oiled, knows how the closing of the oil-hole would affect the movement, and how the would affect the movement, and how the bearings would soon get hot. In much the same manner the sheep's foot begins to wear and inflame, and get dry and hot when this duct is closed, and then the trouble is shown by the animal going lame. The result may easily be, if neglected, that the foot becomes diseased; the pus caused by the inflammation works down into the foot, and what is known as foot rot then happens. If any are seen to be lame, the feet should be examined, and if this gland is found to be amiss, the foot should be washed with warm water, the opening freed, and a little oil or corbolated vaseline injected.

Dan Hawkins and Fred Bogan, bantams, who fought a seventy-three-round draw, at the Golden Gate Club, San Francisco, Tuesday night, continued the fight Wednesday night. Hawkins was knocked out in the fifteenth round.

DAILY, SUNDAY and WEEKLY

# The Most Complete Newspaper in all Departments in the State of Indiana.

No newspaper in the West is more widely or more favorably known than the Indianapolis Journal. By the display of enterprise and strict attention to the wants of the reading public, during the great campaign of 1888, it has taken a leading position among the most prominent journals of the country, and is certainly among the best. Among the newspapers of the State it is pre-eminently the best, and Indiana readers can nowhere else find what they want in the way of State and local news. It circulates largely in every county in Indiana, and has correspondents in every town and village of importance. Its market reports are prepared with the greatest care possible, and no pains or expense are spared to make them accurate and absolutely reliable. It is the only newspaper in the State owning and publishing all the news furnished by the two great press associations (the Western Associated Press and the United Press). in addition to which it furnishes an abundance of special service from all the principal cities of the country. It has been, and will in future be, the aim of the publishers to make the Indianap-OLIS JOURNAL a perfect and complete newspaper, deficient in no department or particular. The paper challenges comparison with any of its contempo-

No Indiana reader, certainly no Indiana Republican, should be without the Journal. While it is thoroughly and soundly Republican in politics, devoted to the interests of the Republican party, the Journal will not allow its news to be colored by partisan bias, but will give the news of the day without fear or

Owing to the prominence of Indiana in the national administration, the Journal gives particular attention to Washington news, which will be given far more completely than ever before. For this reason, if for no other, no Indiana reader can afford to be without it for the next four years.

In addition to its new features, the Journal regales its readers with the ures of this character, which will appear in the Journal during the coming year. These appear most largely in the SUNDAY JOURNAL, which is a special edition, and can be subscribed for and received exclusive of the DAILY JOURNAL.

THE

# INDIANA STATE JOURNAL

(THE WEEKLY EDITION)

One Dollar per year, has a circulation extending to every county in Indiana and adjacent territory. It is a complete compendium of the news of the week, accompanied by the latest market reports, and special departments devoted to agricultural, horticultural and household topics. It is complete in every de-
